Position	**Lead UI/UX Designer/Design Manager**
Profile summary	• Lead UI/UX Designer and Design Manager with over 20 years of commercial design experience, specializing in enterprise SaaS products, CRM systems, scalable design systems, high-fidelity prototypes, and fast prototyping with AI tools • Strong structural and systems thinking, enabling the creation of modular, scalable interfaces with clear information architecture • Expertise in cross-platform web and mobile design with deep hands-on experience using Figma, Sketch, and Adobe tools • Experienced in managing multiple features/projects simultaneously, ensuring engineering teams are consistently supported with design-ready assets • Leadership experience across hiring, onboarding, mentoring, and facilitating design skill-building initiatives • Successfully collaborated with global teams across the US, EU, India, and Australia on complex product ecosystems • Adept at balancing usability, business requirements, and delivery constraints in fast-paced product environments

IT Skills

Technologies	Working experience	Professional level	Last used
SaaS	10 years	Expert	2026
Design System design	3 years	Good	2026
Design management	3 years	Medium	2026
Mobile app design	15+ years	Expert	2024
Web design	20+ years	Expert	2026
Tools	**Working experience**	**Professional level**	**Last used**
Figma (+Figma AI)	5 years	Expert	2026
Claude Code	< 1 year	Beginner*	2026
Google AI Studio	< 1 year	Beginner*	2026
Google Gemini (including Nano Banana)	1 year	Beginner*	2026
Sketch	3 years	Good	2020
HTML/CSS	2 years	Basic understanding	2026

* Already using these AI tools for fast prototyping, ideation, and validation. The space evolves rapidly, so I continue deepening my knowledge actively.

Main Projects

Project Name	**LivePerson: SaaS Help Desk & Bot Builder Platform**
Overview	LivePerson is a complex enterprise SaaS help desk and bot-builder platform. The key challenge was improving existing features and building new ones within legacy infrastructure with limited design resources, while maintaining WCAG 2.0 compliance across web and mobile. ● Designed and improved core features across a legacy SaaS platform, ensuring WCAG 2.0 accessibility compliance ● Contributed to three scalable Design Systems used across web and mobile ● Developed 20+ new features for internal and client use from scratch ● Created an icon set of 1000+ icons in 3 sizes and 2 styles ● Kept 3–4 engineering teams supplied with design-ready work 2–3 weeks ahead at all times ● Collaborated with distributed engineering teams across Australia, India, Germany, France, Eastern Europe, the UK, and the US
Duration	5+ years
Role	UI/UX designer (Individual Contributor, on-site)
Responsibilities	● Designed and improved core features across a legacy SaaS platform while ensuring WCAG 2.0 accessibility compliance ● Contributed to three scalable Design Systems used across web and mobile ● Collaborated with global engineering teams to deliver consistent, user-centered solutions
Technologies used	Figma, AI assistants.

Project Name	**Web CRM for political activists in the US (NDA)**
Overview	Designed an integrated digital platform to support grassroots political activism in the US. The solution included a website, mobile application, and CRM system aimed at empowering activists to organize campaigns, track outreach efforts, and engage communities effectively. Key features included:

	• Tools for managing petitions, volunteer signups, and outreach activities • Phone banking and canvassing tracking • Real-time campaign updates and centralized communication tools • The platform was optimized for accessibility across devices and streamlined coordination between local organizers and leadership • Developed a prototype of a built-in page builder using AI
Duration	3 years + ongoing
Role	UI/UX designer
Responsibilities	• Designed user-friendly web and mobile interfaces to help activists track calls, sign petitions, and manage outreach • Created responsive layouts and intuitive workflows tailored for field use • Collaborated with stakeholders and developers to align features with campaign goals and ensure smooth implementation • Built a consistent design system to support scalability and usability across platforms
Technologies used	Photoshop, Sketch, Figma, Google AI Studio, Claude Code

Project Name	**Web Project for NBA teams (NDA)**
Overview	Redesign and development of high-impact digital platforms for 2 top NBA teams, aimed at enhancing fan engagement and establishing long-term partnerships in the North American sports market. A core UX challenge was improving user experience while preserving the team's unique brand identity within the technical limitations of the NBA-provided website engine.
Duration	3 month
Role	Lead UI/UX designer
Responsibilities	• Led UX design for 2 team websites under the NBA's shared platform • Conducted UX audits and created user flows, wireframes, and high-fidelity prototypes in Figma • Balanced user experience improvements with strict technical and branding constraints • Collaborated closely with stakeholders and developers to

	ensure consistent, functional delivery
Technologies used	Figma

Project Name	**Web/Mobile Project for inventory maintenance and cost projections (NDA)**
Overview	The purpose was to create a design of a SaaS platform from scratch, delivering real-time analytics and dashboards to monitor asset performance and facility conditions across approximately 20 hospitals. The platform helps healthcare providers predict maintenance and depreciation costs for critical equipment. The product suite included a client-facing dashboard, an admin area, and a mobile app for field technicians. Designing clear and intuitive data visualizations for diverse user roles, from administrators to on-site technicians, was crucial to ensure usability across varying technical skills and environments. Additionally, the mobile app was optimized for field conditions where connectivity and time are limited. Initially designed in Photoshop, the design system was later fully migrated to Figma to support scalability, maintainability, and enhanced team collaboration. This migration involved rebuilding UI components and establishing modern workflows to maintain consistency across the platform.
Duration	2 years
Role	Lead UI/UX designer
Responsibilities	• Designed a SaaS platform from scratch, including dashboards, an admin panel, and a mobile app for ~20 hospitals • Created intuitive data visualizations and user flows for both admins and field technicians • Led migration from Photoshop to Figma, rebuilding the design system for scalability and consistency • Delivered responsive web and mobile designs optimized for real-time analytics and limited-connectivity environments
Technologies used	Photoshop, Illustrator, Sketch, Figma

Project Name	**Web/Mobile Project for one of the top jewelry brands in the US (NDA)**

Overview	The design of a bespoke internal iOS tool for a jewelry brand, crafted to optimize in-store customer consultations. Developed tailored mobile applications for iPhone and iPad, enabling shop staff to support customer decision-making by browsing and managing luxury diamond selections seamlessly.
Duration	2 years
Role	UI/UX designer
Responsibilities	• Designed mobile interfaces for iPhone and iPad to support in-store diamond selection • Created user flows and high-fidelity mockups for customer-facing retail tools • Collaborated with product and retail teams to align the design with real-world sales processes • Ensured brand consistency and usability across devices
Technologies used	Photoshop, Illustrator, Sketch

Work Experience

Not related to the design role are excluded

2020 — 2026	**Master of Code Global,** Senior UI/UX Designer/Design Community Lead ***Duties:*** ● Website design, dashboards, SaaS, CRM/CMS ● Mobile app design (iOS/Android) ● Design Management ***Tools & Technologies:*** ● Figma, Adobe Photoshop, Illustrator, Lightroom, Claude Code ● Invision, Zeplin, Balsamiq ● HTML, CSS
2015 — 2020	**Master of Code Global,** UI/UX designer
2007 — 2015	**Master of Code Global,** Web designer
2001 — 2026	**Freelancer,** Web designer (side projects)

Education

1997 — 2002	**East Ukrainian National University,** Ukraine Speciality: Chemical Technology (and Computer Engineering) Degree: Specialist

Additional Courses

2025	**Projector University,** Ukraine Course: Design Management
2019	**SKVOT online school,** Ukraine Course: Art Direction
